

***METHODS AND APPROACHES IN LANGUAGE
TEACHING: (THEORY- PRACTICE- REFLECTION) 2***

Total Physical Response (TPR)- Communicative Language Teaching (CLT)- Competency Based language Teaching (CBT)

Presented by:

Chaima Idmoussa
Sara Missouri
Houda Mamouni
Fatima-Ezzahrae Saoud

Supervised by:

Dr.Laouni Nour-eddine

Training Year: 2025/2026

Table of content

Introduction

**Total Physical Response
(TPR)**

**COMMUNICATIVE LANGUAGE
TEACHING**

**COMPETENCY BASED LANGUAGE
TEACHING**

COMPARATIVE ANALYSIS

Conclusion

Introduction

- Over time, language teaching has evolved from traditional teacher-centered methods to more learner-centered approaches that emphasize communication and active participation.
- This shift reflects a growing understanding that students learn more effectively when they are actively involved in the learning process.

Total Physical Response (TPR)

(Theory – Practice – Reflection)

Definition

- Total Physical Response (TPR) is a language teaching method developed by James Asher in the 1960s.
- TPR is a method of teaching language that connects spoken language with physical movement.
- Learners listen to commands given by the teacher and respond with actions instead of speaking at the beginning.

01

Reduce classroom anxiety and create a low-stress environment

02

Encourage natural and spontaneous language acquisition

03

Improve vocabulary retention through physical movement
which Builds confidence before oral production

Objectives of TPR:

TPR Theories

Theory of Language

- Language is primarily oral communication.
- Meaning is more important than grammatical accuracy at early stages.
- Language is acquired through exposure to comprehensible input.

Theory of Learning

- First Language Acquisition Theory (listening before speaking)
- Brain Lateralization Theory (movement activates right hemisphere, aiding memory)
- Affective Filter Hypothesis (low anxiety improves learning)

Type of Syllabus

- Command-based syllabus
- Progression from simple to complex command sequences
- Focus on comprehension before speaking

Competencies Developed

- Listening competence (understanding spoken input)
- Linguistic competence (basic vocabulary and structures)
- Strategic competence (using context and gestures to understand meaning)

TPR OVERVIEW

Classroom activities

- Imperative drills (teacher gives commands)
 - Action chains (series of connected commands)
- Role reversal (students give commands)

Instructional Materials

- Classroom objects (books, doors, pens)
- Real-life objects (realia)
- The learners' own bodies
 - Flashcards (optional)

ROLES:

Role of the Teacher

- Director of classroom behavior
- Model of accurate language
- Controller of input and pacing
- Designer of action-based tasks

Role of the Learner

- Active listener
- Physical responder
- Observer and performer
- Speaker when ready (not forced)

Micro- Teaching

Olfactory

```
graph LR; A[Olfactory] --> B[Smell]; C[Tactile] --> D[Touch]; E[Auditory] --> F[Ears]; G[Equilibrioception] --> H[Balance]
```

Smell

Tactile

Touch

Auditory

Ears

Equilibrioception

Balance

REFLECTION

Merits

- Reduces anxiety and stress
- Encourages participation
- Improves memory retention
- Motivating and engaging
- Effective for beginners

Demerits

- Limited for abstract concepts
- Does not fully develop productive skills (writing, speaking)
- Teacher-centered in early stages
 - Not sufficient as a complete method alone

Communitive Language Teaching (CLT)

*(THEORY – PRACTICE –
REFLECTION)*

Theory: **Communitive Language Teaching (CLT)**

• Theory

:

Defintion:

Communicative language teaching (CLT) is a language teaching approach which focuses on interaction and communication in real world situations. CLT helps students learn languages by doing activities together and using the language in real-life situations.

Communicative language method:

Meaning over form:

In CLT, the primary goal is communication. While grammar and vocabulary are important, they are seen as tools to convey meaning rather than the end goal themselves

The Functional Aspect:

Language is used to get things done. CLT focuses on functions (requesting, inviting, complaining, suggesting) rather than just structures (past tense, passive voice).

Contextual learning:

Language is taught in real-world contexts e.g., at a doctor's office or a job interview) rather than as isolated sentences.

Teacher is:

.Facilitator: Their job is to keep the communication flowing without dominating it.

.Monitor: You'll often see a CLT teacher walking around with a notepad while students talk.

The learner is:

.Negotiator of meaning.

.Active Participant

.Risk-Taker

Errors:

In CLT, errors are treated as evidence of learning.

Assessment:

From "Tests" to "Tasks"

Practice: Communitive Language Teaching (CLT)

• Application

:

.Objective:
Fluency First

.Typical Activities:

Opinion Sharing

Real-Life Role-Plays

Information

Gaps

Real-World Scenarios

.Authentic materials:

Printed Materials

Realia (Physical

Objects)
Audio-Visual Materials

Micro-teaching

• Information Gap activity : Dream job interviewer

Activity description

■ Task

:

- Job Seeker: Secretly chooses one job from the images on page 23 (e.g., Chef, Mechanic, journalist, farmer, hair stylist or Vet).
- Interviewer: Must guess the job by asking about likes and dislikes.

Example :

Interviewer: "Do you enjoy working outdoors?"

Job Seeker: "Yes, I do. I love helping hurt animals."

Interviewer: "Are you a Vet?"

Job Seeker: "Yes, I am!"

- The Personalized Report
(Communication)

■ Task

- Once the job is guessed, the pair must find a "connection" to their real families.

Example: "My sister doesn't like fixing cars, but she loves cooking like the person in the book."

Lesson 2

I love cooking!

In this lesson, I will:

- Talk and write about job activities people like and dislike using like + (verb)ing.
- Listen for details about job activities people like.

A. Jobs Chant

Listen and clap. Then listen and repeat.

What do you do?
I'm a cook. How about you?
I'm a delivery boy and a student,
too.

What does she do?
She's a graphic designer.
She likes creating menus for the
Downtown Diner.

What does he do?
He teaches at a school.
He loves helping people.
Yeah, the students are cool!

B. Listen

1. Listen. Which job is best for each person? Write the number.

1. Imane

2. Stefanie

3. Reda

4. Abdelkader

5. Rena

6. Idir

☐ vet	☐ hair stylist	☐ journalist	☐ chef/cook	☐ farmer	☐ mechanic
------------------------------	---------------------------------------	-------------------------------------	------------------------------------	---------------------------------	-----------------------------------

2. Listen again. Who do the phrases describe? Write the person's name.

- _____ enjoys working outdoors.
- _____ loves making people feel happy.
- _____ likes making delicious desserts.
- _____ enjoys driving.
- _____ loves helping hurt animals.
- _____ likes meeting new people.

Why this is CLT ?

Feature	Why it works for CLT
Information Gap	The Interviewer doesn't know the answer, so the speaking is "real."
Personalization	Students talk about their real family members, not just the characters in the book.
Choice	Students choose which job to be and which questions to ask.

Reflection: Communitive Language Teaching

(CLT)

- **Reflection**

:

Merits

Real-World Readiness

High Student Motivation

Lowering the "Affective Filter"

Demerits

The "Fossilization" Risk

Assessment Challenges

Resource and Preparation issues

COMPETENCY-BASED LANGUAGE TEACHING (CBLT)

(Theory – Practice – Reflection)

Defintion:

Competency-Based Language Teaching (CBLT) is an approach that focuses on the outcomes of learning, defined as learners' ability to perform specific language tasks competently in real-life situations, rather than on the coverage of linguistic content.

Objectives of CBLT

-  Enable learners to perform real-life language tasks
-  Focus on learners' specific goals and needs
-  Objectives are determined through needs analysis (interviews, questionnaires, observation, tests)
-  Ensure teaching, practice, and assessment align with competencies

CBLT Syllabus & Competencies

- ✓ Focus on **competencies**: what learners **can do**, not just knowledge
- ✓ Describe **skills, knowledge, and behaviors** for real-life tasks
- ✓ Assessment is **criterion-referenced**, measuring task performance

💡 CBLT focuses on demonstrable competencies aligned with real-world performance

Theory of Language in CBLT

01

Language is a means of achieving personal and social needs

Language is a medium of interaction used to achieve specific personal and social goals.

02

Language links forms and functions

Language forms are derived from the functions they perform in real-life situations.

03

Language can be broken down into its component parts

Communicative competence is built from smaller, teachable, and testable components.

Theory of Learning in CBLT

Language learning is skill-based

Learning develops integrated skills from smaller components.

Successful language performance depends on practice

Repeated practice with feedback leads to mastery.

Roles in CBLT

Role of the Teacher

-  **Needs analyst**
Identify learners' needs and select competencies
-  **Materials developer**
Create/assemble resources to support competencies
-  **Assessor**
Monitor learning and reteach when necessary
-  **Coach**
Guide strategy use and skill application

Role of the Learner

-  **Monitor learning**
Monitor learning vs target competencies
-  **Use learning strategies**
Use learning strategies to achieve effective communication
-  **Transfer skills**
Transfer skills to new, real-life situations

Types of Learning & Teaching Activities

-  Activities integrate the four language skills
-  Receptive skills are practiced before productive skills
-  Language learning is integrated with culture
-  Tasks involve meaningful communication
-  Use of varied grouping (pair work, group work, individual work)
-  Tasks develop higher-order thinking and problem-solving
-  Activities prepare learners for real-life situations
-  Activities address different learning styles
-  Learners take active roles in tasks and real-life transfer

Assessment in CBLT

Performance-based

Learners are evaluated on what they can actually do with the language.

Criterion-referenced

Learners are assessed against specific competencies, not compared to other students.

Continuous

Assessment is continuous and happens throughout the learning process, allowing for feedback and improvement.

Mastery-oriented

The focus is on mastery, which means learners continue practicing until they can perform the target competency successfully.

Situation:

A tourist asks for directions

USEFUL EXPRESSIONS

- Go straight
- Turn left / right
- It's next to...
- It's opposite...
- On the corner

Task: Role Play

Student A: Tourist

**Student B: Local
person**

Micro-teaching in CBLT

Target competency: Students will be able to give clear directions to a location in English.

1 State the competency
Clear declaration of learning outcome.

2 Model the competency
"Go straight ahead, turn left at the bank, and the school is next to the post office."

3 Guided practice (role-play)
Student A asks; Student B gives directions using a simple map.

5 Feedback & remediation
Immediate; improve until mastery.

4 Assessment

CRITERION-REFERENCED CHECKLIST

- ✓ Used direction phrases (go straight, turn left/right)
- ✓ Directions were clear and logical
- ✓ Communication was successful

Reflection: Merits & Demerits

✓ Merits

- Focuses on real-life language use
- Clearly defined learning outcomes (competencies)
- Learner-centered and needs-based
- Assessment is fair and transparent
- Encourages active learning and autonomy

! Demerits

- Time-consuming to design competencies and materials
- Requires strong teacher training and planning
- May fragment language into small skills
- Less suitable for general or academic language learning

COMPARATIVE REFLECTION & INTEGRATION OF APPROACHES AND METHODS

TPR, CLT, AND CBLT ARE COMPLEMENTARY AND CAN BE SYNTHESIZED FOR EFFECTIVE CLASSROOM APPLICATION.

Comparison lens

- 🎯 Objectives
- 📖 Theory of language & learning
- 👥 Roles of teacher & learner
- 🔧 Materials
- ⚖️ Strengths & limitations

Toward integration

- 🧩 **Balance**
Use strengths of each method to balance limitations
- 📚 **Synthesis**
Move toward an eclectic approach

COMPARISON: OBJECTIVES

METHOD	PRIMARY OBJECTIVES	OUTCOME FOCUS
TPR	Develop comprehension before oral production.	Reducing student anxiety.
CLT	Build communicative competence and social fluency.	Effective meaning negotiation.
CBLT	Achieve observable real-life performance benchmarks.	Functional mastery.

COMPARISON: SYLLABUS ORGANIZATION

METHOD	SYLLABUS ORGANIZATION
TPR	Command-based; centered on situational action sequences.
CLT	Functional-Notional; organized by notions and social discourse patterns.
CBT/CBLT	Outcome-based; structured around task competencies.

THEORY OF LANGUAGE

TPR

Language is viewed as a coordination of **speech and action**.

CLT

Language is a tool for **communication** and meaning negotiation.

CBT

Language is defined as **social and functional behavior**.

THEORY OF LEARNING

TPR

Learning through **physical response** in a low-stress environment.

CLT

Learning occurs through **interaction** and authentic usage.

CBT

Learning through **performance** and incremental mastery.

ROLES OF TEACHER & LEARNER

Teacher Role

- **TPR:** Director and active model.
- **CLT:** Facilitator and needs analyst.
- **CBT:** Coach and criterion assessor.

Learner Role

- **TPR:** Listener and action performer.
- **CLT:** Negotiator and interactor.
- **CBT:** Active problem-solver.

Typical Activities

TPR: Imperatives, action sequences, and use of realia.

CLT: Role-plays, information gaps, and authentic media usage.

CBT: Real-world projects, task resources, and simulations.

COMPARATIVE ANALYSIS

Materials, Merits & Demerits

Materials

TPR

Realia, classroom objects

CLT

Authentic texts and media

CBT

Task resources and assessment tools

Merits

TPR

Motivation, strong retention

CLT

Fluency, interaction

CBT

Practical relevance

Demerits

TPR

Limited for abstract language

CLT

Risk of weak accuracy

CBT

Can become mechanical

MAPPING THE INTEGRATION

Guiding principles

KEY TAKEAWAYS

- ✓ **Complementarity:** Methods are tools to be blended, not contradictory ideologies.
- ✓ **Balance:** Use the strengths of each method to mitigate the limitations of others.
- ✓ **Reflection:** Constant reflection ensures choices are informed by learner needs and context.
- ✓ **Synthesis:** The goal is an informed, eclectic approach tailored for Moroccan secondary education.

The background is a solid blue color. It features several decorative white elements: a cluster of three stars in the top-left, a single star with a wavy line in the top-right, a single star in the middle-right, a single star below the text, a cluster of three stars in the bottom-right, and a wavy line with a star in the bottom-left.

THANK YOU
